

Council of the European Union provides HR employees secure access to SAP and digital signing

The Council of the European Union has chosen to combine the solutions offered by both TrustAlert and Secude to provide secure access to SAP for her HR employees.

The TrustAlert solution is based on the automated deployment and installation of on-demand electronic certificates to the employees of the Council of the European Union in all member states.

Secude's Signon&secure solution offers secure access to SAP based on the SAP-client, and requires X.509 user certificates to make this possible,.

By making use of the TrustAlert solution, the Council of the European Union can provide in a very easy, fast, yet highly secure manner, all her HR employees with the required X.509 certificates for secure access to her in Brussels centrally hosted SAP R3 environment, no matter where these employee's offices are located.

Secure access to SAP has been effectuated within a matter of days. Also the integrity and confidentiality of the SAP network traffic can now be guaranteed and proven in accordance to compliance regulations for audit purposes. Additionally the digital certificates enable digital signing allowing for proof of which employee was responsible for which transaction, and what document was signed off by whom.

The Council of the European Union represents the member states and is the principle decision making institution of the European Union.

Secude is SAP market leader in user authentication and authorization technology; data integrity; encryption solutions and digital identity management systems.

TrustAlert offers users (employees, partners and customers) controlled access to corporate systems in a user-friendly, highly secure and very cost effective way. Users can be tied to specific properties of their used computer system and obtain automatically time limited access based on a short life certificate. Based on the certificate, delegated access right can be provided to the user.
